I didn't find anything that I thought hit exactly on what you were looking for.
As some operating systems don't use the term "folder" but instead use the term
"directory" I also "directory" in the search strategy.

As part of the full foreign patent files, I searched the authors' names to
see if the authors had any patents out there on this subject.

For two of the sets in the foreign patent files (set 13 and set 20) I printed
off only the titles or title terms because these were rather broad sets.
I reviewed the titles and printed the the records that looked interesting.
I forgot to print the search strategy for set 20, so I wrote that in for you.

Please contact me if you have any questions.
